Assistant Commissioner for Patents
Washington, D.C. 20231

Dear Sir:

In response to the Office Action dated May 7, 2003, (June 7, 2003 being a Saturday). Applicants elect the primer pair of SEQ ID NOS: 1 and 2. This election is made with traverse.

Applicants would like to point out that the invention described and claimed in this application is not limited to methods employing a particular primer pair and that no primers are recited in independent claim 1. The invention relates to a method involving amplifying DNA in a somatic cell identified as having elevated p53 and determining the frequency or nature of mutations in the amplified DNA. The invention is not limited to amplification of particular, defined DNA regions or to particular, defined amplification primers and therefore should be examined in its full scope, regardless of the fact that some dependent claims recite embodiments of the invention involving a particular primer set.

Applicants therefore request examination of claims 1-15 and 20-24 at this time and rejoinder of claims 19 and 25 should a generic claim be found allowable.

RESPECTFULLY SUBMITTED,
